

Suppliers Guide to Supporting BAFTA Albert Production Certification

Productions are encouraged to prioritise suppliers who are local and/or demonstrate environmental responsibility, include sustainability requirements in contracts, supply sustainable goods and support circular economy approaches.

This guide sets out the types of evidence and information productions may request from you, as a supplier, to support their application for certification.

Whether you are providing evidence for a production seeking certification or demonstrating compliance with the Suppliers Directory criteria, the same principles apply: evidence should be dated, production-specific, and clearly demonstrate the sustainability action taken. Quantitative data (for example, kWh, litres of fuel, kgCO₂e, distances travelled, recycled content percentages or quantities reused) should be provided where available.

To help your production evidence your collaboration and sourcing strategies, you can support them with providing:

- Supplier contracts/agreements showing sustainability clauses
- Data reports detailing key sustainable commitments and outcomes
- Communication detailing supplier expectations
- Signed buy-back or reuse agreements
- Invoices detailing hire or purchases made for the production

To help your production evidence power planning and efficiency measures for temporary power solutions, you can support them with providing:

- Equipment hire or power management agreements detailing:
 - Unit size and power demand (kWh)
 - Actual energy consumption (kWh)
 - Battery systems and/or storage capacity (kWh)
 - Generator load (%)
 - Invoices for hydrogen or HVO generators
 - Detail of monitoring tools in place
- Contracts detailing power lead responsibilities for the production
- Purchase orders or invoices for telemetry or power monitoring equipment
- Telemetry reports detailing fuel consumption (kg/m³)
- Agreements detailing shared power units across departments

To help your production evidence use of lower-carbon travel & transport solutions and environmentally conscious accommodation choices, you can support them with providing:

- Emissions reports detailing low emission hire vehicles used
- Invoices confirming vehicles used on production
- Dated EV compliance certificates
- Environmental policies detailing low emission strategies

We also recommend reviewing our [Inclusion Criteria](#) for the BAFTA Albert Suppliers Directory, which outlines tailored requirements based on the nature of products or services you offer. This document must not be uploaded as evidence for an application to the BAFTA Albert Suppliers Directory.
